

St. CATHARINE
SCHOOL

October 12, 2018

Dear Parents,

Consistent with the requirements of the Asbestos Hazard Emergency Response Act, the Columbus Diocesan Schools inspect for Asbestos Containing Building Materials and develop an Asbestos Management Plan for each school.

This ensures that workers and building occupants and organizations are informed at least once each school year about inspections, response actions, and post response actions activities, including periodic re-inspections and surveillance activities that are planned or are in progress.

It also ensures that short term workers who may come in contact with asbestos in a school are provided information regarding the location of asbestos containing building material and suspected or assumed building materials.

St. Catharine School was inspected on August 21. A final report on this inspection will be given to the school on October 17.

Sincerely,

Janet L. Weisner
Principal
